

Lynda CHETTI

Data Analysis and Data Engineering - Available from September 2026-

- 0762907505
- Clichy (92110)
- chetti.lynda@outlook.fr

Réseaux sociaux

in Lynda chetti

Certifications

- AWS Concepts – DataCamp
- Artificial Intelligence Fundamentals – IBM SkillsBuild

Skills

Programming

- Python: NumPy, TensorFlow, Pandas, Scikit-learn, Keras, OpenCV, Tkinter
- C / C++
- SQL

Data Analysis and Visualization

- Power BI
- Tableau
- Dataiku
- Cognos
- Matplotlib
- Excel

Solutions cloud

- Google Cloud Platform (BigQuery, Dataflow)
- Amazon Web Services (AWS)
- Snowflake

Big Data

- Apache Spark
- Talend

Languages

- French**
Fluent
- English**
Intermediate

Soft Skills

- Teamwork
- Analytical thinking
- Sense of responsibility
- Autonomy

Interests

- Ski
- Lecture
- Natation

Profile

Currently completing a Master's degree in Computer Science and Big Data at Université Paris 8, I have developed strong skills in data analysis, data processing, data management, modelling and data visualization. I am able to turn data into reliable insights and contribute to the development of business-oriented solutions.

Professional Experience

Data Analyst – Financial Security Intern

Depuis fev. 2026 BNP Paribas Paris

- Data analysis for Financial Crime Compliance monitoring, covering Transaction Filtering, Name Screening and List Management processes.
- KPI monitoring and validation to assess data quality, process reliability and potential anomalies.
- Preparation of reports and dashboards using Tableau, Dataiku and Cognos to support operational monitoring and decision-making.
- Contribution to the improvement of monitoring processes, control activities and reporting workflows.
- Collaboration with business, compliance and IT teams in a highly regulated banking environment.

ETL & Business Intelligence Developer Intern

De juil. 2025 à août 2025 TS-CONSULT Noisy-le-Grand

- Real estate data management, processing and analysis.
- ETL workflow implementation with Talend for multi-source data integration and transformation.
- Power BI dashboard creation for key performance indicator monitoring.
- Business requirements analysis and optimization of data processing workflows.
- Agile project environment, including sprints and daily meetings.

Education

Master's Degree in Computer Science and Big Data

Université Paris 8 Vincennes-Saint-Denis September 2024 – September 2026

Key courses: Massive Data Indexing, Formal Models for Big Data, Text Mining.

Bachelor's Degree in Computer Science and Video Game Development

Université Paris 8 Vincennes-Saint-Denis | Septembre 2021 – Septembre 2024

Key courses: Programming, Algorithms, Software Development, Multimedia Technologies.

Projects

Generative AI Hackathon 2026 – Data & AI | In collaboration with Mastercard, G2A and Auvergne-Rhône

- Designed a data-driven marketing strategy to optimize visitor attendance in Alpine ski resorts.
- Analyzed complex datasets related to tourism, customer spending and occupancy rates.
- Developed a predictive model to anticipate demand.
- Created a decision-making matrix to support marketing investment decisions.
- Presented an AI-based solution to industry professionals.

Credit Card Fraud Detection

- Designed a Big Data pipeline on Google Cloud Platform using BigQuery and Dataflow to detect large-scale fraud patterns.
- Optimized the processing of large datasets using Python and SQL for advanced analysis.

Cardiovascular Disease Prediction using Deep Learning

- Developed hybrid CNN and RNN models, including LeNet and GRU architectures.
- Prepared and processed data, including class imbalance handling and feature selection.
- Implemented and compared several deep learning architectures, including a blending model based on meta-learning with an MLP.
- Evaluated model performance using appropriate metrics.

Drowsiness Detection using Raspberry Pi 4

- Developed a real-time embedded drowsiness detection system on Raspberry Pi.
- Implemented face and eye detection using OpenCV and Haar Cascade.
- Designed a multithreaded Python architecture to optimize video processing.
- Improved image processing to ensure fast and reliable detection.
